I am currently a Post-doctoral from Department of Computer Science and Engineering, Hong Kong University of Science and Technology, Hong Kong SAR, advised by Prof. Kai Chen. Meanwhile, I am an Associate Professor in the School of Computer Science and Technology, Changsha University of Science and Technology, Hunan Province, Changsha, China. My current research centers on transport protocols and load balancing for modern datacenter networks, RDMA networking, learning-based network systems, communication optimization for distributed training, and programmable switching architectures*.

Education

- **PostDoc, Dept. of CSE, Hong Kong University of Science and Technology** **Hong Kong SAR**
Computer Science and Engineering 1.2022–
Advisor: Prof. Kai Chen.
- **Ph.D., School of Computer Science & Engineering, Central South University** **Changsha, China**
Computer Science and Technology 9.2016–12.2020
Advisor: Prof. Jiawei Huang.
- **M.S., School of Electronic & Information Engineering, Beijing Jiaotong University** **Beijing, China**
Microelectronics and Solid State Electronics 9.2008–1.2011
Advisor: Prof. Xiaoguang Li.
- **B.S., School of Electronic & Information Engineering, Beijing Jiaotong University** **Beijing, China**
Electronic Science and Technology 9.2004–7.2008

Experiences

- **Changsha University of Science & Technology** **Changsha, China**
Associate Professor 12.2021–
Teaching and researching in School of Computer and Communication Engineering.
- **Hunan Mechanical & Electrical Polytechnic** **Changsha, China**
Engineer 8.2014–12.2021
Teaching and researching in School of Electrical Engineering.
- **National University of Defense Technology** **Changsha, China**
FPGA Verification Engineer 8.2013–8.2014
Responsible for FPGA verification of multi-core CPU in Microelectronics Institute.
- **Empyrean Technology Co., Ltd** **Beijing, China**
IC Software Test Engineer 1.2011–8.2013
Responsible for IC simulation software testing.

*Last Updated June. 2025

Research Project

- **The National Natural Science Foundation of China**
Study on Efficient and Scalable Transmission Control Mechanism for Lossy RDMA Networking in Data Centers, NO.62472050, 2025.1.1-2028.12.31. (PI)
- **The National Natural Science Foundation of China**
Study on Transport Control in Data Center Lossless Network Based on Priority-based Flow Control, NO.62102046, 2022.1.1-2024.12.31. (PI)
- **The Young Scientists Fund A-class Project of Natural Science Foundation of Hunan Province**
Research on Key Technologies for High Performance Transmission of Lossy RDMA Networking in Data Centers, NO.2025JJ20070, 2025.1.1-2027.12.31. (PI)
- **The Natural Science Foundation of Hunan Province**
Study on Communication Optimization Technology for Distributed Deep Neural Network, NO.2022JJ30618, 2022.1.1-2024.12.31. (PI)
- **The Science and Technology Project of Hunan Provincial Department of Water Resources**
Research on Digital Twin Technology for Three Dimensional Flood Evolution in Key Watershed Areas, NO.XSKJ2024064-36, 2024.9.30-2025.12.31. (PI)
- **The Scientific Research Fund of Hunan Provincial Education Department**
Study on Load Balancing for Lossless Datacenter Networks, NO.22B0300, 2023.1.1-2025.12.31. (PI)
